

TELEMATICS

RH600

WHELEN[®]

Trakm8 is a technology leader in fleet management, going beyond vehicle tracking to provide fleets with a customisable business intelligence platform. Our unique, integrated telematics solutions provide quick and easy access to detailed driving data such as vehicle location, safety and efficiency analysis, and vehicle health updates.

The ground breaking Trakm8 RH600 is the first 4G camera combined with fully featured telematics available in a compact device, with encrypted video streaming and a host of other benefits for the emergency services. A flexible solution, available with one or two cameras, which can be pivoted securely into a fixed position. This allows for internal driver and outward facing event monitoring at the same time.

Key Features
