

Wheel safety technology that monitors:

Wheel nut loosening • Tyre pressure • Wheel temperature

When an issue is detected, the sensors alert the in-cab receiver so the driver can take the necessary action.

The systems are simple to fit either when the vehicle is built or while it is in service. They are easy to use, offer long battery life and do not require manual calibration or pairing, it is all automatic.

The systems use a modular design concept so the individual needs of each application can be met.

The patented, DVSA Recognised technology helps:

- ✓ Reduce vehicle off road time / unscheduled maintenance
 - Wheel nut loosening / wheel loss
 - High wheel temperatures caused by brake / hub faults
- ✓ Reduce operating costs caused by under inflated tyres
 - Tyre damage
 - Tyre wear
 - Fuel efficiency
- ✓ Safety and the Environment
 - Wheel loss
 - Carbon emissions

Introductory, limited time offers, 20% off RSP (T&Cs apply)

Basic Tyre Pressure Measurement

Speed up stationary tyre pressure measurement without pressure loss or risk of tyre valves failing.

- ✓ 1 x tyre pressure sensor (0-188 PSI) per tyre
- ✓ 1 x Pressure Checker tool
- ✓ Valve extensions and Clamps for inner wheel valves

Price for a vehicle with 6 wheels (eg 4x2) is £137.96 plus VAT

Tyre Pressure Monitoring

Vehicle in motion, dynamic in-cab alerts of tyre deflation and/or high tyre temperatures.

- ✓ 1 x tyre pressure sensor (0-188 PSI) per tyre
- ✓ 1 x Solar Receiver
- ✓ 1 x Battery powered signal booster
- ✓ 1 x Pressure Checker tool
- ✓ Valve extensions and Clamps for inner wheel valves

Price for a vehicle with 6 wheels (eg 4x2) is £209.88 plus VAT
