

ROCK LIGHT CARBYNE

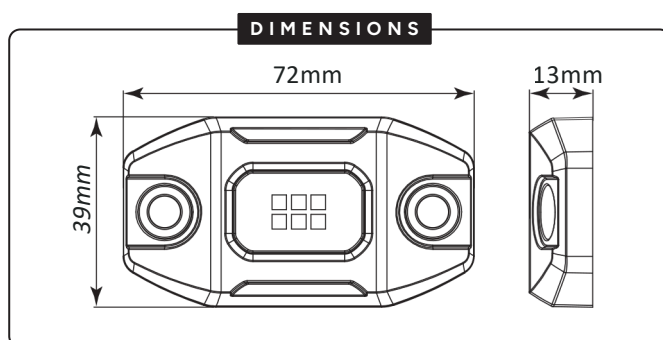

PRODUCT OPTIONS

Carbyne - Black Housing	SS-CAR-B
Carbyne - White Housing	SS-CAR-W

The Carbyne is a versatile, high quality rock light ideal for delivering perimeter illumination where you need it most. Its wide 90° flood beam makes it perfect for lighting up footwells, steps, cabs and load areas, and it's equally suited to off-road, commercial, or utility use. With its slim profile and included angled mount, Carbyne offers flexible installation on flat or sloped surfaces, delivering targeted light exactly where it's needed.

The compact Carbyne is deceptively bright, delivering up to 724 effective lumens from six high-performance LEDs. It's available in black or white housings to suit different vehicle aesthetics, and its rugged build makes it ready to perform in wet, dirty, or high-vibration environments.

Product Information

- Compact surface-mount white light for low-level or periphery illumination
- Small footprint delivering bright light of up to 724 effective lumens
- 6 x 1.5W high intensity OSRAM LEDs
- Wide 90° flood beam for consistent coverage
- Includes both flat and angled mounting pad for flexible installation
- Available in black or white housing
- Durable polycarbonate lens with slimline, lightweight construction
- Wide operating temperature range: -30°C to +65°C
- IP69K rated for water, dust, and pressure resistance
- Ideal for work areas, footwells, storage zones, perimeter or clearance lighting

Power	9W
Current Draw	0.525A@12V 0.275A@24V
Voltage	10-30V
Effective Lumens	724lm
ECE Rating	R10
IP Rating	IP67, IP69K
Warranty	3 Years
